

Our History

Maet Torino is the result of the history of his founders. In fact, MAET's shareholders are operating in the spare parts market since year 1955 starting in South America and expanding lately all over the world thanks to their participation in the creation of MAET Hamburg in Germany in year 1979.

In year 1992, they knew they had to create a productive enterprise in Italy, in the region that would be the best choice for excellence in manpower and technology. Therefore, in 1992 was created Maet Torino, in the Piedmont region, where the headquarter of the main Italian automobile producer is located.

A considerable amount was invested in machinery, fixtures, toolings, and knowhow leading the company to become a point of reference as producer of gears for gearboxes and differential parts suitable for automobiles and trucks.

Maet Torino's factory has a complete range of machinery suitable for the entire process of the teething of sophisticated gears (shaved and/or grinding).

Throughout time were separated the activities between Germany and Italy's companies, concentrating the role of Maet Torino as official supplier of IVECO Turin, thus increasing its quality's steps of production, under the rules of ISO 9001, today ISO 9001:2015.

In year 2016, Maet Torino took in charge the distribution of its production worldwide, with its own commercial program of spare parts suitable for Mercedes-Benz, Volvo, ZF gearboxes and with a wide range of products perfectly interchangeable with the originals.

Since the beginning, was dedicated care and attention to the specifications, materials and production with the objective of a total satisfaction of the customers, on the technical and human side.

Some of our products

Our facilities:

Maet Torino's equipment include some of the best teething machines operated by CNC like Pfauter, Lorenz, Sicmat, etc which they are able to teeth gears under the strict and constant quality's parameters.

Shaving Machine robotized under 10 axes controlled

Measuring CNC control machine

Our commercial department:

Accuracy in each step of production is accompanied by a sure, strong and careful packing in order to deliver our goods worldwide

Our participation in Fairs of the automobile sector:
